BASED Istanbul, TR · remote-ready

I build the systems a multi-brand commerce business runs on. **25+ production systems** across Amazon, Etsy, Shopify, Google Ads, Meta and Pinterest — I designed the architecture, wrote the systems, and own them once they are live. The work is money-critical, not cosmetic: my systems decide which customers get bid on, which products get budget, and what every order actually earned — driving an estimated **+20% revenue** and **+1.4x ROAS** while cutting ad spend **~25%** — so they ship with full test suites, idempotent jobs, and a person in the loop wherever a decision deserves one.

## EXPERIENCE

### MegaGear — System Architect, ML Engineer · Software Developer

Jan 2024 — Jul 2026

Multi-brand commerce seller · Istanbul · Los Angeles (Remote)

- Architected and own 25+ production systems automating a multi-brand seller across Amazon, Etsy, Shopify, Google Ads, Meta and Pinterest — driving an estimated **+20% revenue lift** and **+1.4x ROAS** across the commercial operation.
- Built a four-layer growth platform (Postgres warehouse → nightly scoring → decision layer pushing segments to Google/Meta/Klaviyo → reporting) and a 5-dimensional customer intelligence model at **~85% propensity accuracy**, cutting wasted ad spend **~25%**.
- Shipped daily Vendor Central P&L across 12 marketplaces with a five-way reconciliation gate; delivered a human-gated AI content pipeline and cut AI token cost 40–60% with modular prompts.

### AugeLab R&D Tech. Inc.

Software Developer · Part-time

Jul 2023 — Jan 2024

Remote

R&D software work spanning applied AI and engineering tooling, overlapping the first stretch at MegaGear.

### Nist Reklam ve Metal Ticaret

Software Developer

Jun 2023 — Sep 2023

Istanbul · On-site

Software and interface work at an advertising and metal-trading firm — where the ad-platform side of my work began.

### Emoner7840 Robotics & AI

Programmer & Team Leader

Oct 2018 — May 2026

FRC Team 7840 · Istanbul · Remote

Led the programming subgroup for six and a half years, including a drag-aware ballistics solver for competition robotics.

### Piomak Engineering & Contracting

Software Developer

Jan 2022 — Apr 2023

Istanbul · On-site

Software and interface work at an engineering and contracting firm.

## EDUCATION

### BEng, Computer Software Engineering

2023 — 2027

Istanbul Nisantasi University · Societies: R&D, Artificial Intelligence

## SELECTED SYSTEMS

**Growth Platform** — where every ad dollar goes

**Product Ad Score** — which products get budget

**Three-way Attribution** — keyword × audience × product

**Variation Repair** — fixes broken Amazon families

**Customer Intelligence** — who is worth bidding on

**Daily P&L** — what each marketplace earned

**Audience Sync** — 8 lists rebuilt nightly

**Content Pipeline** — human-gated AI publishing
